Basics of programming, front-end, back-end, English for coding, agile and scrum, and soft skills such as communication, teamwork, problem solving, and growth mindset.

● **BACHELOR OF SCIENCE | 2010-2014**
Environmental Science, Mahidol University

PROJECTS

PETSITTER APP (React, MUI, Tailwind, Supabase, Prisma, Node.js, Express, SQL)

This app has two roles: pet owner and pet sitter. Each role has its own paths and dashbords. This app can search for and filter for specific petsitters. It has features that can upload photos, edit users' information, create a new pet's profile, edit or delete, as well as display all booking history. In addition, pet sitters can manage their services and all bookings. Now deployed by Render

THE MEDIA APP (React, Node.js, Express, MySQL)

The Media is a full-stack web application project that allows everyone to create their own writer profile or reader profile. By using role-based authorization to separate paths Inspired by medium.com. People can search for posts filtered by category and title. The writers can create a profile and upload a profile image, CRUD (Create, Read, Update, Delete) posts and, upload image to post. The readers can CRUD (Create, Read, Update, Delete) Favorites posts.

PORTFOLIO (Next.js, Framer-motion, Email JS)

To introduce myself while developing my skills by using Next.js and Frammer-motion for the first time. To show all of my skills, experience, education, and projects.

RESTAURANT REVIEW (React, Node.js, Express, PostgresSQL)

This is an app for reviewing and rating restaurants. You can review by adding your opinion, editing, or rating. The app will show all reviews and calculate the average rating for each restaurant by using CRUD API and Postgres's aggregate function.

EXPERIENCE

2017 - 2022 | ECOMMERCE

- Imported products from China
- Created e-commerce website such as Wix, Lnwshop, Shopify, Wordpress.
- Conducted e-commerce operations through diverse social media platforms, including Facebook, Google, Youtube, the website, Lazada, LineOA, and Instagram. Achieved a notable profit margin ranging between 20 and 35%.
- Created contents for targeted audiences, ensuring their suitability for each specific platform.
- Executed strategic advertising campaigns across online channels, utilizing a combination of organic and paid traffic. Additionally, implemented effective Search Engine Optimization (SEO) and Search Engine Marketing (SEM) strategies to enhance online visibility and drive engagement.
